

AVEKA

**SPECIALISTS IN PARTICLE TECHNOLOGY
TOLL MANUFACTURING**

AVEKA Group specializes in:
Particle Processing Technology
offering contract manufacturing,
custom research and
development services

THE AVEKA ADVANTAGE

INNOVATION

AVEKA engineers and scientists have a wide breadth of experience to deliver truly innovative solutions to your engineered material challenges.

QUALITY CERTIFICATION

For industrial materials, AVEKA has attained ISO 9001:2015 certification. The delivery of consistent, quality product is our highest priority. For food products, AVEKA has comprehensive food quality programs for processing products to meet your specific needs. Our mission is to provide the highest quality food processing at affordable prices.

CUSTOMER SERVICE

AVEKA utilizes a project management model where a project manager is assigned to your unique project and sees it through from start to finish.

TECHNICAL BREADTH

AVEKA has access and expertise to a broad range of equipment and technology capabilities. We have over 30 different unit operations and this number is growing.

ENGINEERED PARTICLES

Microencapsulation, surface modifications, spray drying, dispersion processing, milling, screening, particle characterization, and more. AVEKA has the know how to get the job done.
